2007 ACCENT | SAFETY

We firmly believe that safety shouldn't be a luxury. As a result of this unwavering commitment to protection for everyone, every 2007 Hyundai has been engineered with an impressive array of industry-leading safety technologies. So whenever you go for a drive in your new Hyundai, you can take peace of mind along for the ride.

GLS IN EBONY BLACK

Anti-lock Braking System

The available 4-wheel Anti-lock Braking System with Electronic Brake-force Distribution helps maintain steering control when braking hard in emergency situations.

Bodyside Reinforcements

For added passenger cabin protection, each door is reinforced with heavy-gauge steel side-impact door beams, while hood-buckling creases and safety stops help protect the front end.

NHTSA Crash Safety Rating ★★★★★

The Accent GLS 4-door model received 5 stars*—the U.S. Government's highest crash safety rating—for driver and front passenger protection in a frontal collision.

*Government star ratings are part of the National Highway Traffic Safety Administration's (NHTSA's) New Car Assessment Program (www.safercar.gov). 2006 Accent 4-door model tested. 3-Door models not available at time of testing.

2007 ACCENT | SAFETY

Six Airbags

Accent's standard safety technologies—unsurpassed in its class—include advanced dual front, front side-impact, and side-curtain airbags.¹ Data from the Insurance Institute for Highway Safety indicates that there's a 45% reduction in fatalities from side-impact collisions, when vehicles are equipped with the combination of side-impact airbags and head-protecting side curtain airbags.*

*The Supplemental Restraint System (SRS) is designed to work with the 3-point seatbelt system. The SRS deploys in certain frontal and/or side-impact conditions where significant injury is likely. The SRS is not a substitute for seatbelts, which should be worn at all times. Children under the age of 13 should be restrained securely in the rear seat. NEVER place a rear-facing child seat in the front seat of a vehicle that has a passenger-side airbag.
*IIHS Study, "In Real-world Crashes, Side Airbags with Head Protection are Saving Lives," August, 2003.

Energy-absorbing Steering Column

The energy-absorbing steering column is an important standard safety feature. In fact, a NHTSA report* reveals that it is second only to the seatbelt system as an effective safety device when it comes to protecting the driver in a frontal collision.

Adjustable Head Restraints

Accent's head restraints adjust easily to help protect against whiplash in the event of a collision. Rear shingle-style head restraints, in all three seating positions, are low-profile for improved driver visibility.

Child-seat Anchors

In the Accent, even the smallest passengers enjoy uncompromising protection. Installing child seats securely is easy and fast, thanks to LATCH child-seat anchors on both rear outboard seats.¹

Front Seatbelt Pretensioners

Front seatbelt pretensioners tighten the shoulder belts during a frontal impact, helping reduce the occupants' forward movement. The force limiters help manage the belt's load across the torso.
